## OVERMOLDED REED SWITCH PK-2000

## Description

Miniature overmolded reed switch «PK-2000» 22,5mm*3,5mm*3,5mm with either straight. It has normally open contact.
It is intended for switching electric circuits of direct and alternating currents with frequency up to 10 kHz , and for passing of direct current.

## Application

Operated relay contacts, magnetic switches, various sensors in household appliances, industrial and special equipment.

## Benefits

Overmolded reed switches «РК-2000»differ greater convenience when installing. The glass bulb of a reed switch is additionally protected, which ensures high mechanical strength. In addition, the plastic sheath ensures an intrinsically safe electric circuit when the switching of the reed switch, which may allow its use in explosive environments. Vacuum tweezers easily takes the overmolded reed switch.
